

As we continue to learn how to cope with the new reality brought on by the Coronavirus and ensuing quarantine and societal practices, here at Salinity we've been hard at work implementing new procedures to ensure that every patron who visits our wellness spa is protected to the greatest degree possible. With years of experience from our founders in the Remediation and Home Health industries, we've now utilized that expertise to develop practices and procedures that mitigate these risks of the ongoing pandemic.

Deep Cleaning and Sanitization Procedures

Between visits, we use a combination of multiple products certified by the EPA to kill pathogens including, but not limited to, SARS-COV-2 (COVID-19) on all surfaces that could be touched by patrons during their visit. This includes all door handles, furniture, electronics, and other surfaces within our facility, in addition to the interior and exterior walls of our Float Room. The products used by our staff are:

- Hypochlorous Acid (EPA Reg. #91582-1)
- Hydrogen Peroxide (EPA Reg. #74559-6)
- Clorox Wipes (EPA Reg. #67619-25)

Air Quality Considerations and Risk Mitigation Protocol

With SARS-COV-2 (as well as many other common pathogens) often transmitting through airborne particles, Salinity employs the use of powerful Air Filtration & Purification equipment ([Aerus-ActivePure-Technology which we sell at our sister company, ask for more info](#)) to remove potential airborne contaminants in addition to the procedures taken to sanitize surfaces throughout. Through this dual-focus approach, our patrons can breathe easy while visiting Salinity knowing that their health and safety is, and remains, a top priority of ours.

COVID-19 Questions

1. Do you have a fever or cough?
2. Are you experiencing extreme fatigue, shortness of breath, or difficulty breathing?
3. Have you traveled outside the state within the past 14 days?
4. Have you been in close contact with anyone that has COVID?

We believe that it is up to all of us to ensure that public health and safety precautions are taken very seriously, and these additional steps and precautions are taken to protect the safety of everyone who enters our spa. We pride ourselves on delivering true relaxation and wellness to every patron, and in order to truly relax, they need to trust that they are in a safe place.

We hope this information and the precautions we take provide you with some newfound peace of mind.

Hope to see you soon!
